    participant NSC as NetworkSingletonConfiguration
    participant CSC as ContainerSingletonConfiguration
    NSC->>CSC: networkConfiguration_Task(containerInfos, singletonAgentHosts)
```

The diagram illustrates a sequence of interactions within the 'Coin Network Configuration' context. It features two participant lifelines: 'NetworkSingletonConfiguration' and 'ContainerSingletonConfiguration'. A message arrow originates from the 'NetworkSingletonConfiguration' lifeline and points to the 'ContainerSingletonConfiguration' lifeline. The message is labeled with the method call 'networkConfiguration_Task(containerInfos, singletonAgentHosts)'. The lifelines are represented by vertical bars, and the message arrow is a solid line with an open arrowhead.
